FinAutomate

INVESTMENT BANKING / Financial automation and reporting

Report type Company Choose an issuer on Dashboard, or switch to Comparison here.

Last action Full workflow | OK | 1 rejected; analysis and report refreshed.

Workflow	What the action does
Import financial data	Append one or more CSV or XLSX extracts; original files stay unchanged.
Clean financial data	Normalize units and dates; retain source references and row decisions.
Validate statements	Reconcile identities and separate accepted filings from exceptions.
Calculate financial ratios	Build 17 formula-driven metrics for each accepted company-year.
Apply banking formatting	Style inputs and references, freeze headers and find formula errors.
Refresh dashboard	Rebuild issuer trends, KPI summaries and the peer table.
Generate financial report	Prepare a company review or peer comparison using the report type above.
Export PDF	Refresh and save the selected report in the reports folder.
View automation log	Inspect counts, elapsed time and errors for each step.
Reset demo data	Back up this workbook, reload six synthetic issuers and run the workflow.
Run full workflow	Rebuild analysis and report from the current raw data.
